ELN (TSXV) is a Gold and Base Metals exploration company, currently focused on its gold project in the Great Northern Peninsula of Newfoundland and also development of a project in New Brunswick which is under an option-to-purchase Agreement with Puma Exploration.

In January 2018, ELN announced, through staking, the acquisition of 100% of three gold projects in the Great Northern Peninsula of Newfoundland. In the Summer/Fall of 2018, exploration programs were launched to investigate all three of the projects. Based on the results achieved at the end of the exploration, management decided to reduce its footprint in Newfoundland from three projects to one and retain the NP Gold Project.

Also, the Murray Brook Project is the largest NI43-101 compliant mineral resources in the Bathurst Mining Camp. Murray Brook is a joint venture project owned 32.5% by ELN and 67.5% by Votorantim Metals Canada (VMC), the Canadian subsidiary of Votorantim (2nd largest mineral resource company in Brazil, with business interests in more than 20 countries). VMC is the Project Operator.

Projects

El Nino Venture has two Projects with a focus on Precious and Base Metals. The projects are located in New Brunswick and Newfoundland and Labrador.
